

Problem: Starvation & Food Wastage.

Justification & thought on problem Solving:

India is primarily an agricultural country. According to Agriwelfare, about 54.6% of the population is engaged in agriculture & allied fields. However approximately 190 million Indians go to bed hungry every night, which is societal evil for India. Due to this many people are victim of malnutrition, starvation & even death. Moreover, the most alarming figure revealed is that approximately 4500 children under the age of 5 years die every day due to hunger. As responsible citizens of Indian Society, we should take steps against hunger.

So, Introducing you 'KIND HEART MEALS' a mobile application which primarily focuses on Food donation & tiffin services & also you can use it as a Food delivery application. Mega kitchens like hotels, Messes, various Food related shops and whoever wants to donate (by choice) can donate leftover Food & can get chance to win exciting rewards.

This application focuses on Food donation. Users can contact delivery partners for food donation. While collecting the food from hotel or mess etc, the delivery partner will take some hygiene tests & will check whether

the Food is Fresh or not. After the tests delivery partner will distribute the collected Food to various NGO's, old aged homes, orphanage, people living in slums. And the NGO agent can setup a counter on railway Stations, footpath to give the food to the people who live there. For the transparency we have added location tracker so we can keep eye whether the agent / partner is reaching to the given location or not. Tiffin Services is also available in the app.

By donating Food we can reduce the wastage of Food and we can fill stomachs of poor people.
